EDUCATION

Northeastern University | GPA: 3.9

Sep 2024 – May 2026

Master of Science in Software Engineering Systems

Boston, MA

Coursework: Object Oriented Design, Web Development, Program Structure & Algorithms, Data Management & Database Design, Software Engineering, Generative AI

Guru Gobind Singh Indraprastha University | GPA: 3.5

Jul 2019 – May 2023

Bachelor of Technology, Computer Science

Delhi, India

EXPERIENCE

Northeastern University

Jan 2026 – Present

Graduate Teaching Assistant, CSYE 7230 Software Engineering

Boston, MA

- Conducted technical code reviews on **25+ student projects**, evaluating **software architecture**, **design patterns**, and **SOLID principles** compliance
- Mentored **20+ students** on design patterns implementation and **test-driven development**, improving project **test coverage by 80%** and reducing code complexity across submissions
- Analyzed and resolved software issues spanning **backend services**, **database performance**, **third-party integrations**, and **deployment configurations** across diverse technology stacks

Bhardwaj Tech IT Solutions Pvt Ltd

Sep 2023 – Jul 2024

Software Development Engineer

Gurugram, India

- SMC Mutual Fund App:** Designed and deployed **10+ RESTful APIs** using **Java** and **Spring Boot** for fund listings, advanced filters, top/popular funds, single-fund details, and graph data services
- Architected end-to-end **Mutual Fund Order Execution System** handling **5 transaction types** (lumpsum, SIP, SWP, STP, redemption) — covering **validation**, **placement**, **acknowledgment**, and **reconciliation** for **10K+ users**
- Integrated third-party **exchange APIs** to manage complete **order lifecycle** including **payment status tracking** and **failure-safe processing** across high-volume transactions
- Optimized **API performance** and implemented **production monitoring** ensuring high availability and reliability in a live fintech environment

Jun 2022 – Jul 2023

Software Engineer Intern

Gurugram, India

- Engineered **CMOTS data ingestion pipeline** for **360 ONE Wealth** integrating **3+ external APIs** with **S3** and **relational databases**, optimized for **near real-time data access**
- Built **authentication** and **order-flow APIs** supporting onboarding and transaction processing across **2 user tiers** (**UHNI/HNI**), and developed **5+ modules** including **user dashboards** and **watchlist**
- Automated failure monitoring via **scheduled cron jobs** with **MS Teams alerting**, reducing manual intervention for production incidents

SKILLS

Languages: C++, Java, Python, JavaScript

Backend & Frameworks: Spring Boot, Spring Cloud, Node.js, Express.js, FastAPI, RESTful APIs, Hibernate

System Design: Microservices, OOP, SOLID Principles, Design Patterns, Multithreading & Concurrency, DSA

Cloud & Infrastructure: AWS (EC2, RDS, S3, VPC, IAM, ALB), Terraform, Packer, Docker

Databases & Caching: MySQL, PostgreSQL, MongoDB, Redis

DevOps & Tools: Git, GitHub Actions, CI/CD, Maven, JUnit, Linux, Bash, Jira

Machine Learning: Supervised Learning, Unsupervised Learning, TensorFlow, Pandas, LangChain

Frontend: React.js, JavaScript, HTML, CSS

PROJECTS

EcoPlate – Food Waste Reduction Platform | *Spring Boot, React, JWT, MySQL, Docker*

- Architected **full-stack platform** with **role-based access control**, **dynamic pricing engine** adjusting food listings based on real-time weather and demand, and **interactive maps** for live availability tracking
- Implemented **JWT authentication**, **BCrypt password hashing**, and **Spring Security** with **sub-1-second API response times** for **30+ concurrent users**

Cloud-Native Auto-Scaling Infrastructure | *Terraform, Packer, AWS, GitHub Actions*

- Architected **multi-environment cloud infrastructure** using **Terraform** and **AWS** (VPC, EC2, RDS, ALB), reducing deployment time by **85%** through automated provisioning
- Achieved **99.9% application availability** through **fault-tolerant multi-AZ deployment** with **IAM roles** and **KMS encryption**
