SAURABH KASHYAP

Boston, MA | (508) 251-9255 | saurabh.k@itjobinbox.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Software Engineer with 3+ years building Java/Spring Boot microservices, React applications, and AWS data workflows. Experienced in financial APIs, SQL performance, production reliability, and RAG-based developer tools.

TECHNICAL SKILLS

Languages & Frontend: Java, Python, SQL, JavaScript, TypeScript, React, Next.js, HTML/CSS
Backend & AI: Spring Boot, Spring Batch, Spring Cloud Gateway, Spring Data JPA, REST APIs, FastAPI, Spring AI, RAG, MCP
Design & Architecture: System Design, Low-Level Design (LLD), OOP, SOLID Principles, Design Patterns
Cloud & Data: AWS (EC2, S3, RDS, Lambda, CloudWatch), Terraform, Docker, MySQL, PostgreSQL, Redis, pgvector, OpenSearch, Kafka
Developer Tools: Git, GitHub Actions, Jenkins, CI/CD, JUnit, Mockito, ELK Stack, Kibana, OAuth 2.1
Certifications: AWS Certified Solutions Architect | Spring Professional Certification | Claude Certified Architect

WORK EXPERIENCE

Software Engineer, ServiceNow | Massachusetts, USA — Feb 2026 – Present

- Consolidated 45+ REST endpoints behind Spring Cloud Gateway, standardizing API routing across Java/Spring Boot workflow microservices and simplifying client integration.
- Orchestrated nightly workflow synchronization with Spring Batch and AWS S3, using parallel chunk processing, validation, and fault-tolerant error handling.
- Raised Redis cache hit rate from 62% to 89% through cache-aside reads and TTL tuning, limiting repeat MySQL queries in reporting services.
- Tuned MySQL reporting queries with composite indexes and query refactoring to improve dashboard data retrieval and reduce database overhead.
- Collaborated with QA and DevOps to centralize ELK logging and Kibana alerts across 8 microservices, cutting issue detection from 14 to under 4 minutes.

Software Development Engineer, Bhardwaj Tech IT Solutions Pvt. Ltd. | Gurugram, India — Mar 2022 – Jul 2024

- Delivered 10+ Java/Spring Boot REST APIs for SMC's mutual fund investment platform, supporting fund discovery, order placement, and transaction tracking.
- Automated BSE StAR MF payment-status checks with scheduled jobs, updating PENDING investment orders from exchange responses to keep transaction status current.
- Cut fund-search API latency from 650 ms to 180 ms through Redis caching, SQL query optimization, and database connection pooling.
- Implemented Spring Batch reconciliation with AWS S3 and OpenSearch to flag unmatched order IDs, detect discrepancies, and handle transient processing failures.
- Designed React fund-discovery dashboards with advanced filters, interactive performance charts, and API-backed investment data for customer research.
- Simplified React order-entry and tracking flows for 5 investment types through reusable forms, client-side validation, and API-driven status updates.

PROJECTS

Repo-Sensei | AI Codebase Engineer — GitHub

- Indexed 2.1M lines across 11.4K files in ~3.5 minutes using hybrid search and a UI–API–database code graph, raising feature-trace recall from 0.27 to 0.62 (2.3x).
- Built FastAPI, PostgreSQL/pgvector, Celery/Redis, and Next.js with OAuth-secured MCP tools for Claude Code and IDEs; cut tool response time 78% and sandboxed AI code in gVisor with 4,000+ tests.

TAssist | AI-Powered Course Assistant — GitHub

- Created a Spring AI RAG assistant with Claude, pgvector, and React, streaming cited answers and saving an estimated 8 hours/week of routine support.
- Indexed 100+ presentation slides using Apache POI and PostgreSQL embeddings, linking generated responses to source slide citations.

Cloud-Native Auto-Scaling Infrastructure — GitHub

- Provisioned multi-AZ AWS infrastructure (VPC, EC2, RDS, ALB) through Terraform, with IAM permissions and KMS encryption.
- Reduced deployment cycles by ~65% using Packer AMIs and GitHub Actions CI/CD, adding CloudWatch and StatsD release monitoring.

EDUCATION

Northeastern University | M.S. Computer Software Engineering | GPA: 3.75/4.00 — May 2026
Guru Gobind Singh Indraprastha University | B.Tech. Computer Science | GPA: 3.5/4.0 — Jul 2023
